Requests for Immunization Records in ImpactSII, Ohio’s Immunization Registry

Immunization records are protected by medical confidentiality laws.

The Ohio Department of Health (ODH) recommends that you contact your health care provider for the records. As your provider, they can verify your identity and provide a copy of your medical records, and they may have access to ImpactSII.

Another option is to contact a local Ohio health department. All Ohio health departments have access to ImpactSII, and you can find a list of local health departments by clicking here.

You may have also at one time provided a copy of an immunization record to a camp, workplace, or school that could share that record with you.

ODH staff cannot verify whether a patient record exists in ImpactSII solely on the basis of a phone or email request. We can release immunization records, but first you must mail in a request with an original signature – not a copy, fax, or email – on our Authorization to Release and a photo-copy of a government-issued ID with a signature we can compare.

The forms can be mailed to:
Immunization Program
Ohio Department of Health
246 N. High Street
Columbus, OH 43215

The paperwork cannot be emailed or faxed.

Reporting immunizations to the registry began in earnest in 2002: Consequently, the likelihood of your immunization being in ImpactSII diminishes if it was administered before 2002.

Moreover, immunization reporting has always been voluntary in the state of Ohio, so the provider who administered your vaccine may not have reported it to ImpactSII.
